# AI Workflow Acknowledgement

SYNCOS PROJECT DOCUMENTATION

Throughout the development of the SyncOS Throughput Analysis, synthetic data generation, and repository structuring, I utilized specialized AI tooling to accelerate the workflow. This document outlines the specific contributions of the applied models.

## Gemini

ANALYTICAL & GENERATIVE ENGINE

I utilized Gemini as the primary analytical partner for the core engineering and documentation phases of this project. Specific uses include:

- **Brainstorming & Solution Structuring**
- **Data Generation**
- **Data Validation**
- **Documentation Generation**

## Jules

REPOSITORY MANAGEMENT

I utilized Jules to handle the project's codebase administration and onboarding documentation. Specific uses include:

- **Repository Structuring**
- **README Formulation**
